

Steinbock

A two-fabric wall quilt of the alpine ibex under the stars of Capricornus

Steinbock is German for the alpine ibex and for the sign of Capricorn. The quilt speaks the same language as the patchwork lion: two fabrics, and nothing but squares, rectangles and half-square triangles on a 5 cm grid. The ibex's horn is a staircase of triangles with three ridges, the beard is a single triangle and the eye is one dark square. Above the ibex, the four brightest stars of the constellation stand in their true order.

FINISHED SIZE

100 × 100 cm

GRID

20 × 20 units of 5 cm

PIECES

69 squares and rectangles,
45 half-square triangles

FABRICS

2, plus backing

LEVEL

Confident beginner

TECHNIQUES

Rotary cutting, half-square
triangles, straight-seam
piecing

A star chart in the top band

Read the band as a star chart: you are facing south on an autumn evening, when Capricornus sits low over the horizon, so east is on the left and west is on the right.

Deneb Algedi, the brightest star of the constellation, gets the big sawtooth star. Its name is Arabic for “the tail of the goat”, so it shines above the ibex’s tail. **Nashira** sits next to it. **Dabih** and **Algedi** mark the goat’s head and horns in the old star maps, so their pinwheels hang above the ibex’s head.

Down in the night window, an **edelweiss** star grows under the ibex’s chin. It is a friendship star block, reversed out in light on dark.

The ibex faces right and the lion faces left. Hang the ibex to the left of the lion and the two look at each other.

α Algedi

Capricornus as it appears in the sky (top) and the four stars the band shows (bottom). Dot sizes follow brightness.

What you need

MATERIAL	AMOUNT	USED FOR
● Fabric L, light	1 m	ibex, edelweiss, frame, sky band, half of every triangle
● Fabric D, dark	1.3 m	Night window, star centres, half of every triangle, binding
Backing	120 × 120 cm	Piece it if your fabric is narrower
Batting	120 × 120 cm	Thin cotton or cotton blend keeps a wall quilt flat
Hanging sleeve	22 × 95 cm	Leftover backing works
Thread	Neutral grey cotton, 50 wt	Plus quilting thread to match each fabric

Contrast is everything. Fabric L should be clearly lighter than fabric D. Photograph them side by side in black and white: if they look alike, the ibex will disappear. A mottled or hand-dyed light fabric gives the shimmer of the lion's gold. A near-solid dark lets the stars read crisply.

Tools: rotary cutter, mat and long ruler, a square ruler of at least 6.5 cm for trimming triangles, a fabric marker, pins, and sticky notes for the piece codes.

How this pattern works

Seam allowance

All sizes include 0.75 cm seams. Test it: two 6.5 cm squares sewn together must measure 11.5 cm across.

Grid

One grid unit is 5 cm finished. Every piece is a whole number of units, so every seam lines up with the grid.

Piece codes

L = light fabric, D = dark fabric, numbered from smallest to largest. Label each stack as you cut.

WOF

Width of fabric: cut strips selvage to selvage. The plans need 105 cm of usable width.

Pressing

Press triangle seams toward the dark fabric. Press every other seam open: open seams keep the many intersections flat.

Diagrams

All diagrams show the right side of the fabric. Gaps show which pieces are joined first: the narrower the gap, the earlier the seam.

CUTTING

Cut the strips, then the pieces

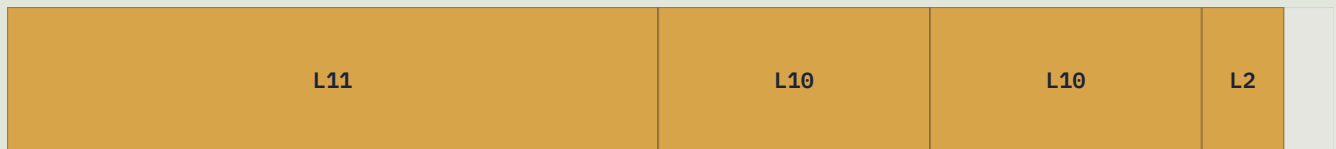

Each diagram is one strip cut across the width of the fabric, with the pieces in cutting order. Grey areas are left over. Pieces marked “trimmed” are cut to length from a wider strip and then trimmed to width.

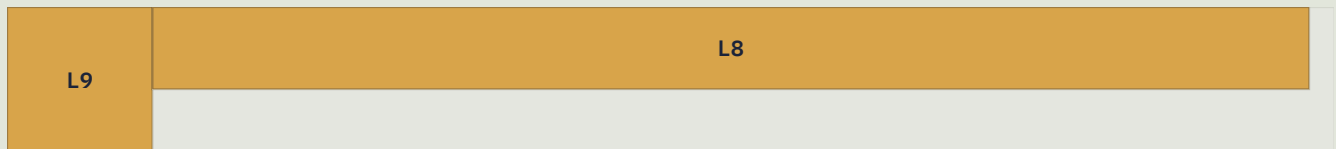

Fabric L, light

1m · ibex, frame, sky band

Cut 2 strips 11.5 cm × WOF, 2 strips 8 cm × WOF for the triangle squares, 6 strips 6.5 cm × WOF.

1 11.5 cm strip → L11 at 51.5 cm · 2 × L10 at 21.5 cm · L2 at 6.5 cm

2 11.5 cm strip → L9 at 11.5 cm · L8 at 91.5 cm, trimmed to 6.5 cm wide

3 8 cm strip → 13 squares 8 × 8 for the triangles

4 8 cm strip → 10 squares 8 × 8 for the triangles

5 6.5 cm strip → L7 at 81.5 cm · L4 at 21.5 cm

6 6.5 cm strip → L7 at 81.5 cm · L4 at 21.5 cm

7 6.5 cm strip → L6 at 71.5 cm · L4 at 21.5 cm · L2 at 11.5 cm

8 6.5 cm strip → L6 at 71.5 cm · L5 at 31.5 cm

L4	L3	L3	L3	L2	L2	L1				
9 6.5cm strip → L4 at 21.5cm · 3 × L3 at 16.5cm · 2 × L2 at 11.5cm · L1 at 6.5cm										
L2	L1	L1	L1	L1	L1	L1	L1	L1	L1	
10 6.5cm strip → L2 at 11.5cm · 9 × L1 at 6.5cm

D14	21.5 × 21.5 cm	1	section 11

Backing and batting: cut both to 120 × 120 cm. Hanging sleeve: one strip 22 × 95 cm.

STEP 1

Make 45 half-square triangles

Every triangle unit in the quilt is the same: half light, half dark. Only the way it is turned changes, and every diagram shows it by where the light half sits. The cutting plan gives 23 pairs of squares, so you will make 46 units, with one to spare.

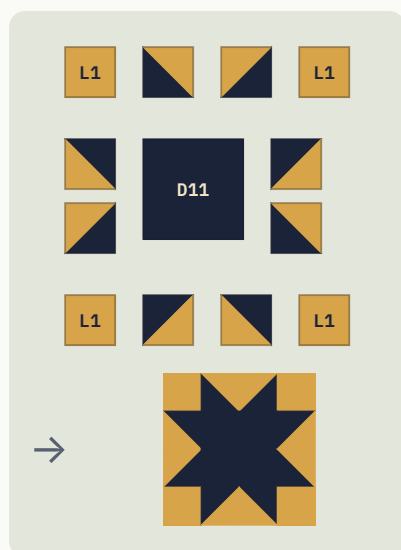

1. Draw a diagonal line on the wrong side of each light 8 cm square.
2. Place it right sides together on a dark square. Sew 0.75 cm from the line on both sides.
3. Cut on the line. Press the seam toward the dark fabric.
4. Trim to 6.5 × 6.5 cm. Lay the 45° line of the square ruler on the seam so the diagonal runs exactly corner to corner.

Faster: eight at a time. Instead of the small squares, cut 6 light and 6 dark squares of 16 cm. Draw both diagonals, sew on both sides of both lines, cut horizontally, vertically and along both diagonals, then trim. That gives 48 units. Their edges are on the bias, so press gently and do not pull.

STEP 2

Piece the stars

Five small blocks: the sawtooth star of Deneb Algedi, three pinwheel stars and the edelweiss. Sew them first. In the later diagrams each block appears as one unit inside a dashed outline.

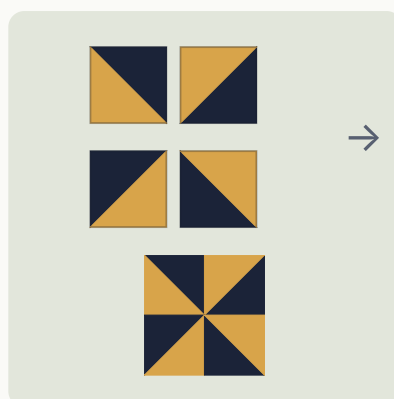

Deneb Algedi

SAWTOOTH STAR • MAKE 1

You need 8 triangles, 4 × **L1**, 1 × **D11**.

1. Join the top row and the bottom row: an L1, two triangles, an L1. The two dark points of each pair meet at the centre seam.
2. Join two triangles top to bottom for each side, then sew them to the left and right of D11.
3. Join the three rows. The block measures 21.5 × 21.5 cm.

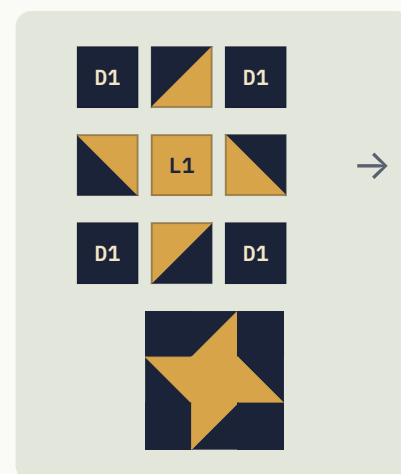

Nashira, Dabih, Algedi

PINWHEELS • MAKE 3

You need 4 triangles per pinwheel.

1. Join the triangles in two rows of two, exactly as shown, so all three pinwheels spin the same way.
2. Join the rows. Pin the centre so the four points meet. Each block measures 11.5 × 11.5 cm.

Edelweiss

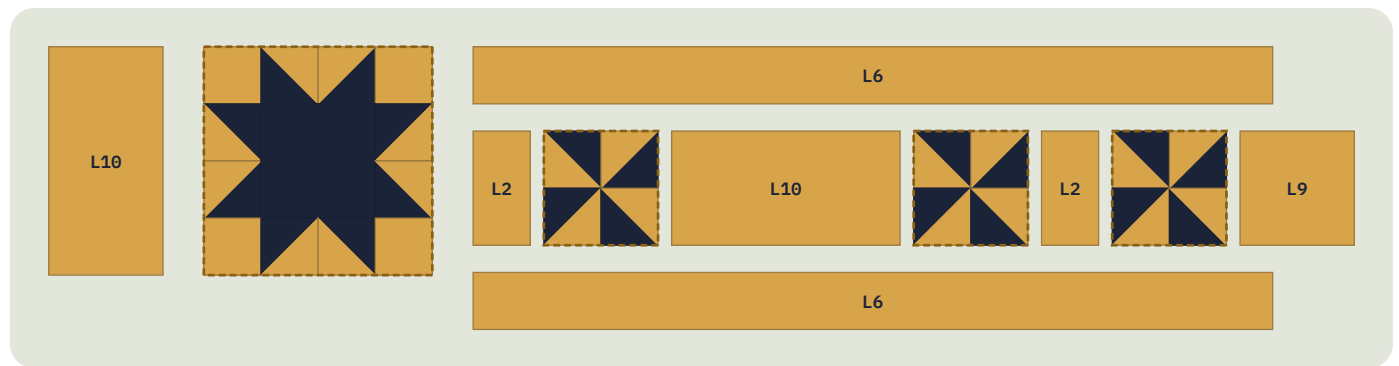

FRIENDSHIP STAR • MAKE 1

You need 4 triangles, 4 × **D1**, 1 × **L1**.

1. Join three rows of three: D1, triangle, D1 / triangle, L1, triangle / D1, triangle, D1.
2. Join the rows. The block measures 16.5 × 16.5 cm.

STEP 3

Assemble the sky band

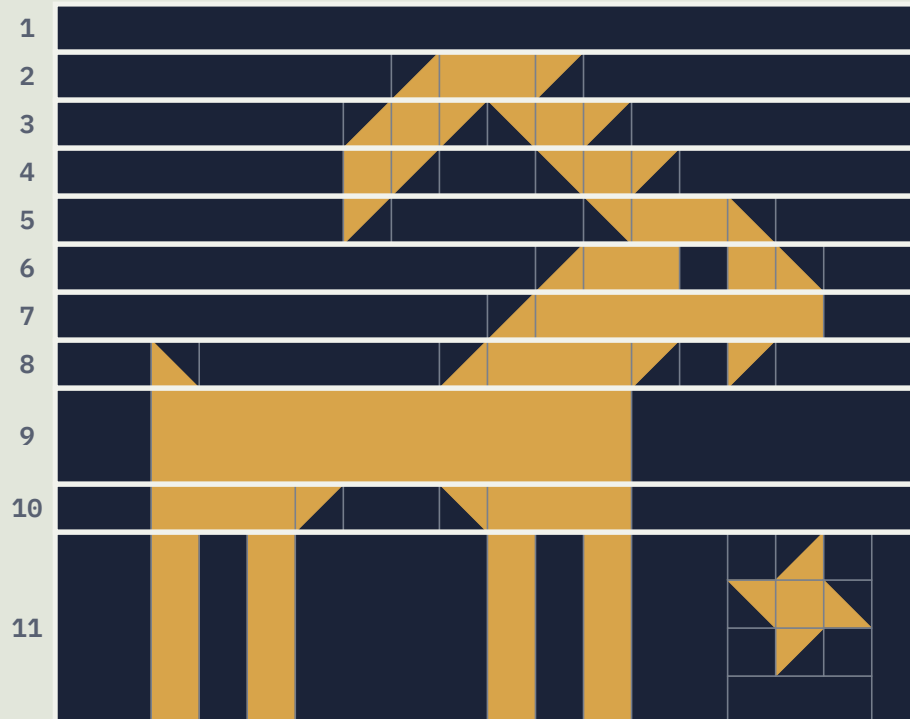

1. Middle row, left to right: **L2** **Nashira** **L10** **Dabih** **L2** **Algedi** **L9**. It measures 71.5×11.5 cm. Note that L10 lies on its side here.
2. Sew an **L6** strip to the top and another to the bottom. The unit measures 71.5×21.5 cm.
3. Join **L10**, the Deneb Algedi block and this unit, left to right.

The finished band measures 101.5×21.5 cm. Its light background and the light side strips of the frame become one colour field, so the stars float in a light sky.

STEP 4

Piece the night window in 11 sections

The window is pieced as eleven horizontal sections. Sew each section, press the seams open and check its size before going on. Then join sections 1 to 11 from top to bottom.

The window and its sections. Thin lines are the seams inside each section.

In each diagram below, the pieces are spread apart along the seams you sew. Most sections are a single row joined left to right. Section 11 has one column to make first: the edelweiss block over a

D3.

Triangles appear as small icons in the sewing order. For example,  is a triangle unit with the light half at the top right.

Keep the lines straight. The horn, the neck and the legs run across section seams. Pin at every triangle point and every seam that must meet before you join two sections.

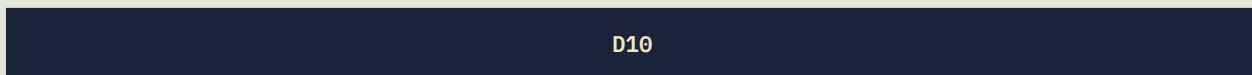

The finished window measures 91.5 × 76.5 cm.

Section 1

1

Night sky above the horn: a single strip.

Measures 91.5 × 6.5 cm

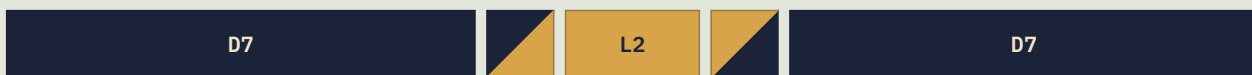

One piece: **D10**

Section 2

2

The crown of the horn.

Measures 91.5 × 6.5 cm

Join left to right **D7**  **L2**  **D7**

Section 3

3

The horn arches over. First ridge on the right.

Measures 91.5 × 6.5 cm

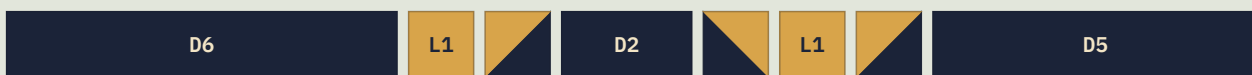

Join left to right **D6**  **L1**   **L1**  **D6**

Section 4

4

Horn tip on the left, second ridge on the right.

Measures 91.5 × 6.5 cm

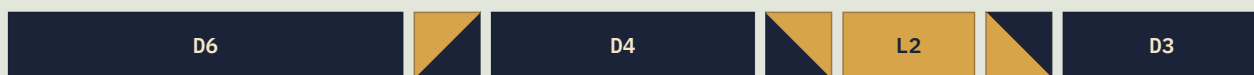

Join left to right **D6** **L1**  **D2**  **L1**  **D5**

Section 5

5

Horn tip, third ridge and the top of the head.

Measures 91.5 × 6.5 cm

Join left to right       

Section 6

6

Back of the head, the eye and the nose.

Measures 91.5 × 6.5 cm

Join left to right       

Section 7

7

Neck and muzzle.

Measures 91.5 × 6.5 cm

Join left to right    

Section 8

8

Tail, withers, throat and beard.

Measures 91.5 × 6.5 cm

Join left to right         

9

The body: one long L11.

Measures 91.5 × 11.5 cm

Join left to right **D11** **L11** **D13**

10

Section 10

The belly curve.

Measures 91.5 × 6.5 cm

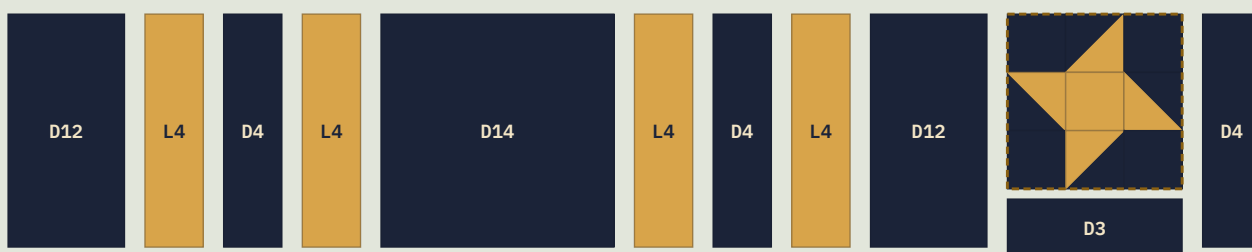

Join left to right **D2** **L3**  **D2**  **L3** **D6**

11

Section 11

Four legs and the edelweiss.

Measures 91.5 × 21.5 cm

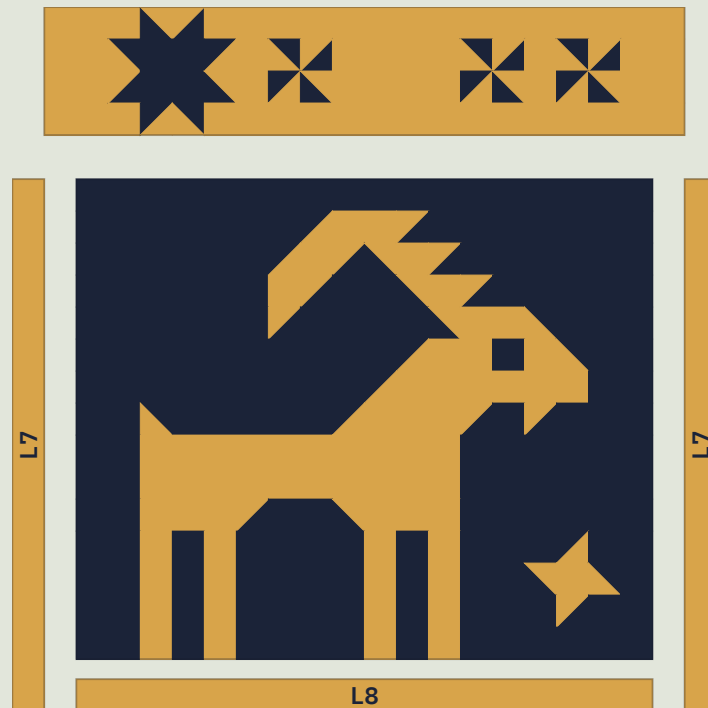

Make unit **a** : join top to bottom **Edelweiss** **D3**

Join left to right **D12** **L4** **D4** **L4** **D14** **L4** **D4** **L4** **D12** **a** **D4**

STEP 5

Frame and assemble the top

Wide gaps are sewn last: window and L8 first, then the side strips, then the sky band.

1. Sew **L8** to the bottom edge of the window. The ibex now stands on solid ground.
2. Sew an **L7** strip to the left and right edges. Each runs from the top of the window to the bottom of L8.
3. Sew the sky band to the top. Match its ends with the side strips.
4. The quilt top measures 101.5 × 101.5 cm. Stay-stitch around the edge, about 0.3 cm from the raw edge, to keep the outer seams from opening.

Quilt, bind and hang

Quilting

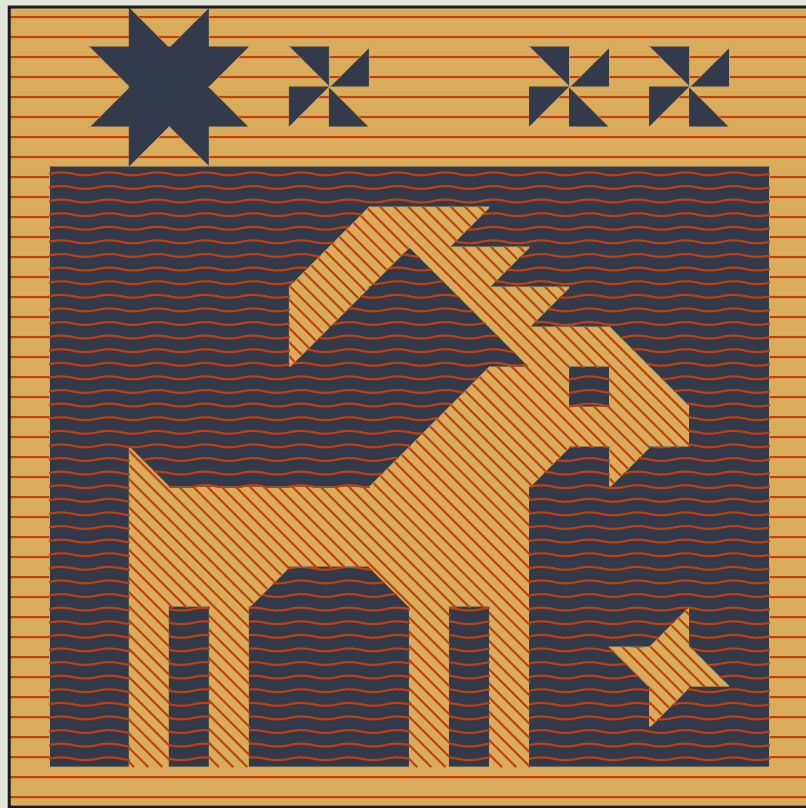

Layer the backing (right side down), the batting and the top. Baste with pins or spray. Then quilt:

1. Stitch in the ditch around the ibex, the stars and along the frame to stabilise the layers.
2. **Night:** gently wavy horizontal lines 1.7 cm apart, like wind over a ridge. A free-motion meander works too.
3. **Ibex:** straight diagonal lines 1.25 cm apart, parallel to the horn ridges. They read as fur.
4. **Band and frame:** straight horizontal lines 2.5 cm apart. Stop at the stars.

Use thread that blends into each fabric, or a slightly lighter gold on the night fabric for a starry shimmer.

Binding and hanging sleeve

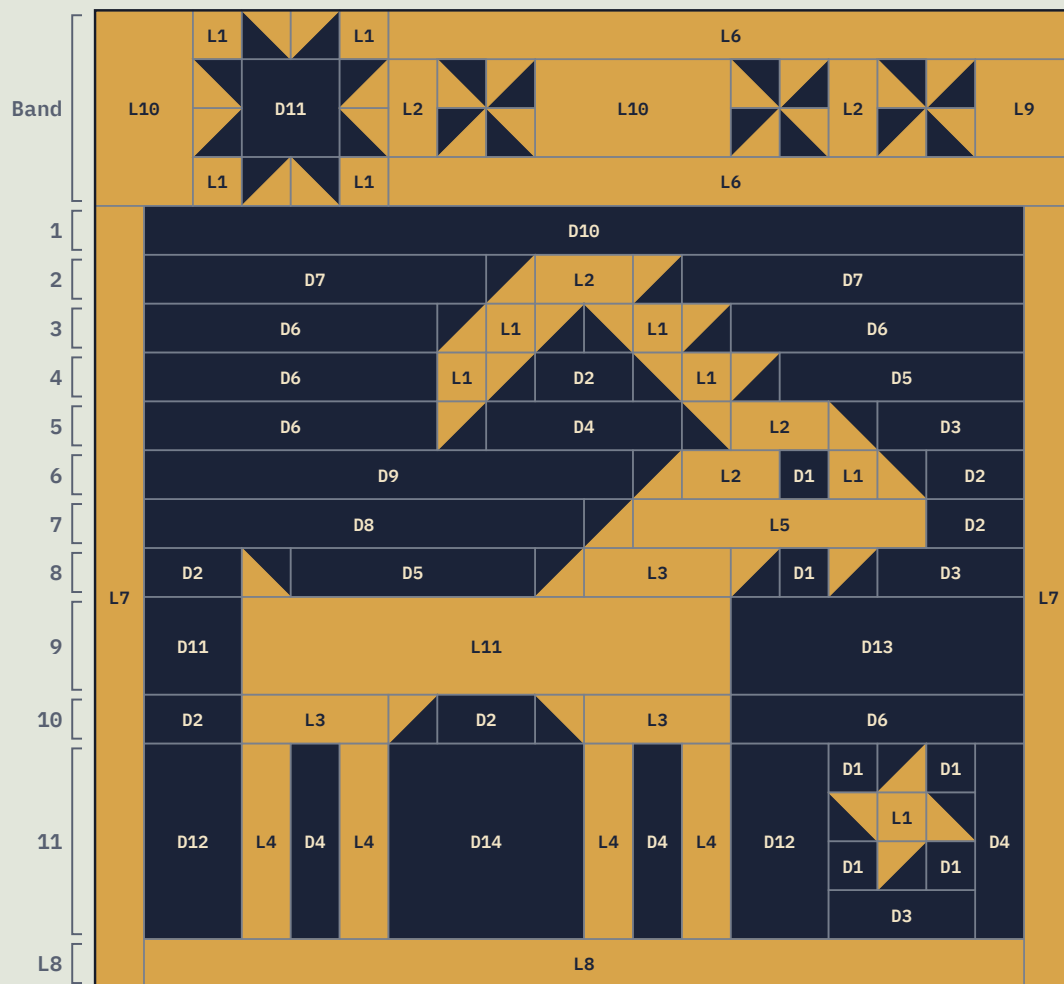

1. Trim the batting and backing even with the top.
2. Join the five binding strips end to end with diagonal seams and press them open. Fold the strip in half lengthwise, wrong sides together.
3. Hem the short ends of the sleeve strip. Fold it lengthwise, wrong sides together, and baste its raw edges to the top edge of the back. The binding seam will catch it.
4. Sew the binding to the front with a 0.75 cm seam, mitring the corners. Turn it to the back and hand-stitch it down.
5. Hand-stitch the folded lower edge of the sleeve to the backing. Leave a little slack so the rod does not distort the front.
6. Add a label with your name, the year and the star sign.
